P.W. Eaton
Project Manager

Please accept this letter to serve as a recommendation for Mr. Wijil Pustiko.

During the Arun Booster Compression Project (1993-1995), Wijil Pustiko worked for Mobil Oil Indonesia as a piping inspector. We found him to be knowledgeable in the field of piping and welding, and largely due to his efforts, the piping program on this project was very successful.

I personally found Mr. Wijil Pustiko to be one of the better inspectors I have worked with in Indonesia, and would not hesitate to include him on any future project for Mobil. As his assignment is now complete, I wish him continued success in his career, and would recommend him for any project your company may have.

Sincerely,

R. Scott Alley
