About Me

I am deeply committed to the principles of IT governance and management, as it allows me to play a crucial role in establishing standardized practices to achieve a cohesive framework of processes, procedures, and standards that align with architecture mandate and standard requirements. This alignment ensures that the objectives, vision, and standards of the organization are in line with its business needs.

Currently, I oversee Enterprise Architecture (EA) governance, focusing specifically on process enhancement, risk management, and assurance as well as the Architecture role capability and competency requirements for PETRONAS Group. This role involves collaborating with executives, delivery leaders, and stakeholders across various business units within the organization. Through this experience, I have gained valuable insights into implementing essential governance measures for digital and ICT space, including the establishment of the Enterprise Architecture Council, Pre-Procurement Guidelines for Digital, the EA Framework, the EA Operating Model, and PETRONAS Digital Foundation and ICT Standards.

My contributions to PDSB and PETRONAS Group are including driving process enhancements, such as improvements to delivery core processes, Delivery Excellence Management, GT&C and PDSB Operating model and process improvements and LOA requirements.

In my previous role at PETRONAS, I led the SAP Governance and management for SAP Software Asset Management initiatives, overseeing SAP license compliance, internal audits, SAP Security Governance, and Capability Management for SAP resources.

My early career as an SAP ERP-PP Specialist equipped me with over 10 years of experience managing full project lifecycles across diverse industries, including oil and gas, leaf and tobacco manufacturing, palm oil production, rubber industries, and palm oil finished products.

Certifications:

1. COBIT 5 Foundation and Implementation certified.
2. TOGAF® 9 Combined Part 1 and Part 2 certified.
3. Prince 2 Foundation certified.
4. SAP Production Planning-Process Manufacturing certified.
